*Keeping you safe. Reducing your bills.
Giving you choice.*

Introducing Rockdoor from **srjwindows**

conservatories. sunrooms. windows. doors.

Rockdoor has been the driving force behind composite door technology for over 20 years.

During that time, more than half a million doors have been produced at our Lancashire innovation and production centre.

We use nickel-coated solid brass for our hook locks, high impact PVC-U skins to resist cut-through, carbon fibre to reinforce our inner frames and a unique S-Glaze system that locks the glass into your door for life.

It means Rockdoors can't be forced open.

And because every Rockdoor is made-to-measure rather than mass-produced to a standard shape before being trimmed to size, it's an exact fit for your home.

The toughest, safest and most energy efficient door.

*srjwindows are proud to be a
Rockdoor Trusted Installer*

*Rockdoors core is 60% stronger
than standard composite doors.*

Strength, security and thermal efficiency

For 20 years we've been investing in the technology needed to build you the toughest, safest and most energy efficient doors available. Our locking systems and carbon fibre reinforced inner frames protect families across the UK.

All Rockdoors feature our unique S-Glaze technology. It means the glass is locked into your door for life.

Eliminating leaks. Reducing draughts. No threat of forced entry.

The toughest, safest and most energy efficient door.

On the face of it, Formula 1 racing cars, orbiting satellites and fighter jets would seem to have little in common.

In fact they all rely on carbon fibre to guarantee that they'll be able to withstand phenomenal force.

No surprise then, that we chose it to reinforce your Rockdoor.

A door style to suit every home

From the finest contemporary door styles including the Vogue, Vermont, Indiana and Dakota, to traditional Cottage styled doors and Stable doors, Rockdoor has it all.

Each Rockdoor is made-to-measure and so is unique to your home. Because most commonly-available composite doors are mass-produced - often to a standard shape and size, and then cut down or otherwise modified to fit your doorway, they're inherently weaker, less secure and more prone to draughts.

As well as being lovingly made for you from scratch to the exact size you need, Rockdoors are built from PVC-U rather than Timber or GRP and so performs well when it comes to energy efficiency.

Furniture option

Stainless steel bar handles (Available in the Dakota, Indiana, Vermont & Vogue)
 Indiana & Vermont door styles have minimum width size restrictions.

Security

Obscure backing glass

Choosing an obscure backing glass in replacement of clear glass will reduce the Door Energy Ratings - we recommend all designs featuring Gluechip glass are backed using clear glass to enable us to use energy efficient glass. Alternatively if you would like a different backing glass, the options to the left are available.

Additional designs

We are pleased to offer the following glass options to help you match certain property types or existing window patterns.

Georgian Bar is only available in Windsor, Jacobean, Kentucky, Portland & Stable View Light. Available in White, Light Oak & Woodgrain. Georgian Bar reduces the energy rating.

Furniture and colours option

Rockdoors are available in 13 colours so you can choose what's right for you. As Rockdoors are 'made to order', not 'cut to size', all colours are available inside and out.

Please check our colour swatch before ordering or use our door visualizer at Rockdoor.com.
